Table content [ShowHide]NameNarcos: Cartel WarPackagecom.ftxgames.narcosPublisherFTX GamesCategoryStrategyVersion1.39.00Size66MMOD FeaturesNoRequiresAndroid 4.1 If you've never seen this movie, then, in general, there are still many holes in the violent time law about the context of the game in the 80s. Society has been very chaotic with the United States and Colombia wars against the great drug trafficking network in the history of the world. Create your Narcos hard base: The Cartel War will be a drug magnate who turns society into a true criminal institution. Initially, it would be just a freemason and some old factory, to show strength you need to build the institution bigger and stronger, dominance of the Colombian criminal classes. You can open the box to get more teens to support you in your boss's career. Overall Narcos: Battle of Cartel game has quite similar to Clash of Clans. To create a powerful institution, you first need to build new buildings, manage your business and improve your technology. When your product is too much, you can send it by plane to distribute it. In addition, the construction of defensive structures such as towers, fireworks, ... is an important factor that has made your base safer. You just need a proper layout, it needs to be upgraded to be stronger than the building over time. Take part in classic battles When you have a large base with a strong defense system, the next thing you need to do is find fighters, collect them and train them to be a right-hand man for you. They are important in collecting fighters because they not only help defend better, but they are also the main force to attack the enemy base. This is not a strategic game paying to win the game to win the most important factor to win experience and tactics. Each player will have different defensive postures when attacking them, so you need to use fighters appropriately with the right tactics. An interesting thing is the alliance between players in this game, so you can interact with your friends. Connecting allied helps you attack the enemy more easily and quickly, and your allies can help you when you're attacked. Graphics and sound I was impressed by the very detailed 3D design and sharp graphics of Narcos: Cartel War. Top-down view helps you watch, browse the whole scene to reasonably build your base. However, the ad seems to make quite a lot of players feel uncomfortable sometimes. This may give you some benefits like jumping 10 minutes to complete the building, but we recommend you buy the game's ad blocker package.
